

PLEDGE STATEMENT

The Michigan Clean Marina program promotes and celebrates voluntary adoption of measures to prevent and reduce pollution from marinas and the recreational boating community. Facilities receiving Clean Marina designation in this program are recognized as exemplary environmental stewards of the Great Lakes and inland waters.

As a pledging partner, we pledge to do our part to improve and maintain Michigan's waterways by reducing and eliminating releases and discharges of harmful pollutants, sediments, nutrients, general refuse, and anything else that can damage aquatic environments. We also pledge to strive for continuous improvement in our daily environmental stewardship practices.

We will work in partnership with the Michigan Clean Marina program to cooperatively identify opportunities for both practical and innovative practices that lead to reductions and elimination of pollution not just at our facility but also in any adjacent waterways. Environmental stewardship will be addressed within the following operational areas:

- Marina design and siting
- Boater education and outreach
- Vessel maintenance and repair
- Petroleum storage and transfer
- Sewage and greywater handling
- Solid, liquid, and hazardous wastes
- Stormwater/boat wash runoff
- Environmentally Preferred Purchasing
- Aquatic Nuisance Species prevention
- Waste containment and disposal

We pledge our commitment to proactively pursue the fulfillment of our environmental stewardship goals and to educate our boating constituents regarding best management practices and pollution prevention activities. We understand that in return for this commitment we will become partners with the Michigan Clean Marina program and be eligible to receive all related benefits and recognition.
