

Lake Michigan Tournament Fishing

ECONOMIC IMPACTS TO COASTAL COMMUNITIES

Even during a time of declining participation in Great Lakes fishing, interest in tournament fishing for salmon and trout remains high. Tournaments attract anglers who compete in events and also non-anglers who enjoy the festival atmosphere.

TOURNAMENT ANGLER DEMOGRAPHICS

Captains who fished in salmon and trout tournaments answered a survey distributed at tournaments during 2009.

- Surveys were returned by 176 captains who participated in tournaments in Michigan and Wisconsin.
- The average team consisted of a captain and 4.6 anglers; 1.1 non-anglers also travelled with the fishing team.
- Most captains (89%) did not include paying customers on their tournament teams.

GRAND HAVEN SALMON FESTIVAL

The three-day Salmon Festival included live music, wine and salmon tasting, and children’s activities such as a salmon fishing simulator. Recreational fishing provided a focal point for the festival, but the majority of economic impacts were generated by 1,061 tourists who travelled to participate in festival events but did not fish in the Big King Contest. The example of the Grand Haven Salmon Festival demonstrates how communities can leverage interest in fishing to benefit local economies and encourage connections to the Great Lakes.

EVENT	GROSS SALES	EMPLOYMENT HOURS
Big King contest	\$33,198	833
Other festival events	\$578,168	16,876
Total	\$611,366	17,709

Economic Impacts of Lake Michigan Tournaments to Coastal Communities

The 16 events of the 2009 Lake Michigan Tournament Trail included 1,019 fishing teams, 5,706 anglers and 1,121 non-anglers who attended tournaments. Most (71%) of these people were not residents of the port community that hosted the tournament they attended. Details of estimated economic impacts are provided in the full project report (O’Keefe and Miller 2010).
