Michigan Sea Grant is recruiting applicants for fellowship programs

The fellowships offer terrific career-building and networking opportunities, real-world training, salary and benefits, and a chance to explore careers where science and policy meet.

Graduate students with a wide range of backgrounds (e.g., science, policy, law) and a strong interest in Great Lakes, coastal, or marine issues are encouraged to apply. Programs require a full-time commitment and most, but not all, fellows participate after graduating.

:: KNAUSS MARINE POLICY
The Knauss Fellowship program matches graduate students with “hosts,” such as congressional offices, the National Marine Fisheries Service, or the U.S. Fish and Wildlife Service. Fellows work on a range of policy and management projects related to ocean, coastal, and Great Lakes resources.

:: NOAA COASTAL MANAGEMENT
This program places recent graduate students in state coastal management programs. Fellows spend two years working on projects related to climate change, shoreline protection, spatial planning, or other coastal issues.

:: MICHIGAN SEA GRANT GRADUATE STUDENT FELLOWSHIP
Michigan Sea Grant offers one- to two-year fellowships for graduate students enrolled full-time at Michigan universities who are interested in research relevant to current Great Lakes issues. This fellowship supports student research and enhances academic and professional development opportunities. Research fellows work with a faculty member at an accredited institution in Michigan and an agency sponsor.

:: MICHIGAN SEA GRANT EXTENSION FELLOWSHIP
The Michigan Sea Grant Extension Fellows Program is designed for Michigan State University master’s or doctoral students interested in engaged scholarship for research and extension engagement within the Great Lakes Region.
